General Description.

The land in this Township, consists generally of rolling hills of 2^d rate quality of soil, which are covered with an excellent growth of bunchgrass affording excellent facilities for stock raising. The Township is well watered by Camp Creek in the Western part, in which there are some good bottomlands, also by several smaller Brooks in the Eastern part.

The Eldorado Mining ditch carrying about 500 inches of water runs through the Township from S.W. to N.E.
