This Township lies upon the dividing ridge between Barst River and Millers Creek and consists generally of rolling land it is well watered by numerous Branches, the majority of which run South into Millers Creek, the remaining Branch into Barst River. Excellent Pine, Fir and Hemlock timber grows in almost all of the Barstons Creek Branches, grass abounds in all over the Township.

The Eldorado Mining Belt carrying about six inches of water runs through the North Western part of the Township.

Aug 1875
