REGISTERED PROFESSIONAL LAND SURVEYOR

OREGON NOVEMBER 30, 2007 JASON L. HATFIELD #69454

EXPIRES: 6/30/2013

### DESCRIPTION OF MONUMENTS AND ACCESSORIES SET AND METHODS USED:

At the corner point as located by survey, we set a 5/8"x30" iron pin 29" in the ground, with attached 2" diameter aluminum cap marked as shown and built a small mound of stone.

### From which, I SET THE FOLLOWING REFERENCE POINT:

► A 5/8"x30" iron pin bears N.35°19'E., 22.66 ft., with attached yellow plastic cap marked "BENCHMARK SURVEYING"

### I also **SCRIBED A BEARING TREE:**

► A 10.2" DBH Englemann spruce bears S.10°W., 3.9 ft., marked 1/16 BT

Used a total station to measure the bearing and distance to the RP. The distance to the bearing tree was measured using a steel tape, measuring to a 50d nail driven into the side center at the root crown of the tree. Bearing to the tree was obtained with a magnetic compass with 15° East Declination. Attached a yellow aluminum Bearing Tree tag to the tree.
