NARRATIVE

This survey was performed at the request of Cary Clarke, on behalf of Chase Real Property, LLC, an Oregon Limited Liability Company. The purpose of this survey was to re-plat the property described in Instrument No. 07280041 and 07280177 and 08320095 deeds of Baker County, Oregon.

The City of Sumpter approved the re-plat of all of Block 12; Lot 6 of Block 13, Block 14 and Block 23 lying westerly of Cracker Creek; all of Block 15 and all of Block 22; all that portion of Block 24 and Block 25 lying north of the northerly right of way line of the Sumpter Valley Highway, all in Vinson's Addition. Including a portion of the following streets: Bourne Avenue, Magnolia Avenue, Park Street, New Street, Fairview Street and High Street and the alley's within the boundaries shown hereon. Also a portion of the vacated Riverside Avenue.

A search was made of the available records pertaining to this survey. Field measurements were made to locate existing monuments and to establish the new lot corners of this re-plat. The basis of bearings for this re-plat is the Woodwell Baseline which has been used for many years for the bearings in the City of Sumpter.

I used the plat record bearings and distances shown on Vinson's Addition to establish the north and west boundaries. I located the center line of Cracker Creek to establish the easterly boundary. Reference monuments were set on the lot lines near the edge of Cracker Creek. The offset distance to the true lot corner is given on the plat. The northerly right of way line of the Sumpter Valley Highway was monumented by the Oregon Department of Transportation and shown on Drawing No. 8B-35-6. I recovered and accepted the ODOT monuments shown hereon.
