THOMAS J. HANLEY P.E., P.L.S.

## SURVEY NARRATIVE

To accompany survey of Lots 9 and 10, Block 3,  
LACK'S ADDITION TO BAKER, OREGON

Baker County Survey No. 9-40-190

This survey was performed at the request of Ralph Devita for the purpose of monumenting the East boundary of a portion of that property described in Baker County Deeds film volume 72-29-015 and 75-21-108.

Monuments along College Street at its intersections with "E", "F", and "G" Streets were not found. The positions for these lost monuments were calculated using distances shown on map of J. W. Bailey, City Engineer, dated May 17, 1912. Monuments along Fifth Street at its intersection with "F" and "G" Streets were found in place and Block 3 was subdivided in the prescribed manner.
