

NARRATIVE

This survey was made to preserve the chain of evidence for the existing monuments as noted. The existing monuments were referenced and then removed during construction. Although these are generally accepted control points, this survey in no way makes any judgement as to their significance. A semi-total station was set up on the existing pin and references set and measured. Data was collected and stored. Distances between hub and tack points are calculated using coordinate geometry.

LEGEND

- ▷ SET 5/8"X30" REBAR WITH CAP MARKED CITY OF BAKER PLS 2162
- SET HUB AND TACK REFERENCE
- Reference point as noted.
- Description of existing monument prior to construction
