LEGEND

- Found 5/8" iron pin, accepted as Section Corner
- Found 2" brass cap, set by Survey Number 09-40-687
- Found 3" brass cap in concrete headwall, set by
 Oregon Department of Transportation
- Found 5/8" iron pin with 1 1/2" aluminum cap (unless otherwise specified), set by Oregon State Highway Department
- Found 1/2" iron pin (unless otherwise specified), with yellow plastic cap marked RPE 2808, set by Survey 09−40−008
- Found 5/8" iron pin with yellow plastic cap marked HANLEY ENGR PLS 1206, set by Partition Plat 1994-002 (Survey Number 09-40-392)
- Found 5/8" iron pin with 1 1/2" aluminum cap marked APA LS 60000, set by Survey Number 09-40-727
- Set 5/8" x 30" iron pin with plastic cap marked BGB SURVEY MARKER

NARRATIVE

This survey was done at the request of Matt Gibb in preparation for an ALTA survey. I recover monuments as shown. I hold pins found at stations 2114+00, 2116+00 and 2124+00 and develop a centerline by record offset. I find the pin at Station 2110+00 slightly out of position from record offset and hold this pin for line only. I hold ODOT pins along Baker-Homestead Highway as well as the pin set by Survey 09-40-392 for the South right-of-way line. Pins set by Survey 09-40-727, marking the realignment of Best Frontage Road are harmonious with measured distances and I hold these in place. I base a position for the East quarter corner of Section 9 as per Survey 09-40-727 and 09-40-392. For the old alignment of Best Frontage Road, I hold the pins set on the West line of Parcel 1 of Partition Plat 1994-002 and offset 60 feet to the West to place the West right of way line. For the South line of the Northerly tract, I hold a line the record 938.40 feet South from the North line of the Northeast quarter of Section 9. To establish the East line of the Southerly tract, I hold a point the record 511.87 feet from the East line of Section 9, along the South line of the Northerly tract. I run this line the record 594 feet South, parallel with the East line of the Section. There are 3/4" OD iron pipes that fall in the approximate corners of the Southerly tract. I find no record of these and therefore do not accept these.

Fencelines are off as shown. I find no other unusual conditions with this survey.

BAGETT, GRIFFITH & BLACKMAN
2006 Adams Avenue, LaGrande, Oregon

Situated in the Northeast quarter of Section 9, Township 9 South, Range 40 East of the Willamette Meridian

BAKER COUNTY, OREGON
