#### NARRATIVE

This survey was done at the request of Jeff Anderson, realtor for the potential purchaser of this property. Mr. Anderson wanted to have the exteriors of the property monumented. I recover corners as shown. Aliquot monuments I find very harmonious with Survey 11–43–07. I use the record 1 foot. offset from the witness corner at the Southwest corner of Section 21, rotating to my basis of bearing. For the Interstate 84 right-of-way, I hold monuments found at Stations 1198+13.28, 1202+91.38, 1203+84.52, and 1209+05.46 as I find them harmonious with Strip Map 8B–29–01. Holding stations and offsets as per Circuit Court Case recorded in 66 16 076 and 66 16 080, I find that a prominent braced angle iron fence corner in concrete occupies the monument position at Station 1217+50. I hold the center of the fence corner as the true corner position.

The structure on the property encroaches about 37 feet onto the the property to the North, as does a well house and the access to the property. The fenceline falls well to the North as shown.

A small area of this property may fall within Section 20. The preliminary title report indicates there to be a cloud on this portion of property. Due to added expense of section subdivision and title research, this area was not addressed by this survey.

I find no other unusual conditions with this survey.
